OAK BROOK, Ill. (September 9, 2008) - Theodore J. Dubinsky, M.D., from the University of Washington School of Medicine, will bring his medical expertise to Mexico as part of the International Visiting Professor Program offered by the Radiological Society of North America (RSNA). The program fosters international relations among radiology societies to assist with medical education in developing and newly developed nations.

Dr. Dubinsky, associate professor and director of body imaging at the University of Washington, will be joined by one other fellow radiologist as he embarks Sept. 12 on the nine-day trip. He will spend his visit giving presentations and teaching intensive seminars to members of Mexico's radiology societies and hospital radiology departments.

The program is mutually beneficial. The visiting team of radiologists informs local doctors and hospitals about the latest advances in diagnostic and therapeutic radiology. In turn, the visiting professors experience firsthand the obstacles faced by medical professionals in the host countries.

"It is extremely important to share our knowledge and experience," said Dr. Dubinsky. "The visiting RSNA professors program allows us the opportunity to learn from and even do research with our colleagues overseas and to see some of these studies and methods that we don't currently use at home."

Dr. Dubinsky is accompanied by Giovanna Casola, M.D., of the University of California San Diego Medical Center.

The International Visiting Professors Program was founded in 1986 and is administered by RSNA's Committee on International Relations and Education (CIRE).
