SUPPLEMENTARY BIBLIOGRAPHY

Notes: This bibliography corresponds roughly to the topics of the didactic portion of the workshop. The list of references included here is meant to provide broad coverage of each topic. It is not a required reading list for the workshop. The references in each section are listed in reverse chronological order of publication.

A. Diagnostic Imaging Evaluation: General

B. Introduction to Clinical Trials

C. Introduction to Biostatistics

D. Statistical methods for diagnostic test evaluation: General
Textbooks, Chapters, Tutorials
E. Statistical Methods for Diagnostic Test Evaluation: Special topics

E1. Biases and Their Control

E2. Predictive Value of Tests

E3. Meta Analysis of Diagnostic Accuracy Studies

F. Quality of Life

G. Imaging as a Measure of Therapeutic Response

H. Imaging as a Predictor of Therapeutic Response

**I. Imaging in clinical studies**

**J. Screening Studies: Methods**

**K. Modeling and Cost-Effectiveness Analysis**

**L. Reporting of Marker and Accuracy Studies**

M. Medical Ethics

N. Resources Available on the Web

- [Selected FDA GCP/Clinical Trial Guidance Documents](#)
