RSNA/QIBA Disclosure of Conflict of Interest

As agreed after discussion on the July and August 2012 QIBA Steering Committee teleconferences, in the interest of transparency, and to address concerns expressed by potential QIBA partners, QIBA SC members were asked to complete a conflict of interest disclosure form.

A conflict of interest may occur whenever an individual or member of that individual’s immediate family (including spouse, dependent children or other financially dependent family members) has a direct or indirect interest or relationship, financial or otherwise, that may influence the individual’s ability to exercise independent judgment in any action affecting RSNA or its members. A conflict of interest may exist in those instances where the communications or actions of an individual on behalf of RSNA/QIBA would (a) result in personal gain or advantage, (b) have an adverse effect on RSNA’s (QIBA’s) interests, or (c) obtain a gain or advantage for a third party to whom the individual has some fiduciary duty. A conflict of interest does not necessarily make an individual ineligible to serve, but may limit the individual’s ability to participate in certain activities or discussions.

Members of the QIBA Steering Committee have made the following disclosures:

Andrew J. Buckler, MS
Elucid Bioimaging, Inc.
President and CEO
vascuVis, Inc.
President, CEO

Paul L. Carson, PhD
QIBA
Technical Committee Facilitator, Ultrasound
General Electric Global Research
Supervisor of research that is being conducted pursuant to a grant or agreement with this commercial entity. They are a subcontractor on my NIH Grant R01, CA 91713
TomoWave Laboratories, Inc.
Member, Scientific Advisory Board

Richard L. Ehman, MD
Resoundant, Inc.
President, CEO, Board Member, Stockholder

Maryellen L. Giger, PhD
Hologic, GE, MEDIAN, Mitsubishi, Toshiba
Receiver of Royalties
Hologic/R2, Quantitative Insights, QView
Shareholder and/or Stockholder
