QIBA Profile Adoption

Looking at Profiles from a Multi-Center, broad Community Clinical Trial Perspective such as the NCI National Clinical Trial Network

What is working?

- Have a clear scientific basis
- Are focused on the topic of the profile
- Are vendor neutral
- Provide a lot of detail
- Are standards based
- PET QIBA Profile overlaps with VIEW criteria
- DWI QIBA Profile is referenced in NCTN Trials

Knopp.16@osu.edu

What is not working?

- Is not yet accepted as a requirement for e.g. Credentialing
- Not integrated into OEM Equipment Specs or Maintainance
- Is not being tested regarding feasibility of implementation (Post Publication, Phase 4 assessment)
- Not yet seen as necessary while perceived to be a burden
