

Martin Allen-Auerbach, MD, is the Director of Nuclear Medicine at the Santa Monica UCLA Hospital, and Assistant Professor in Nuclear Medicine, Division of Pharmacology, at the David Geffen School of Medicine at UCLA. Dr. Allen-Auerbach has published both basic and clinical research focused on optimizing PET/CT imaging strategies in various cancers, the clinical evaluation of new PET tracers and the advantages of PET/CT over other imaging modalities when it comes to staging and assessment of treatment response in malignant disease. Apart from conducting several clinical studies, he serves as an attending physician for the Departments of Nuclear Medicine both at the Westwood and Santa Monica Hospital.
