Aldo Badano is currently the Laboratory Leader for Imaging Physics in the Division of Imaging and Applied Mathematics, Office of Science and Engineering Laboratories, Center for Devices and Radiological Health, US Food and Drug Administration. Dr. Badano leads a program on the characterization, modeling and assessment of medical image acquisition and display devices using advanced experimental and computational methods. Dr. Badano is also an adjunct faculty member of the Graduate Program in Bioengineering at the University of Maryland, College Park. He received a PhD degree in Nuclear Engineering and a MEng in Radiological Health Engineering from the University of Michigan in 1999 and 1995, and a ChemEng degree from the Universidad de la República, Montevideo, Uruguay in 1992. He serves as Associate Editor for several scientific journals and as a reviewer of technical grants for DOD and NIH. Dr. Badano has authored more than 150 publications and a tutorial textbook on medical displays.
