

Chekesha S. Clingman, Ph.D.

Dr. Clingman is a Senior Scientific Program Manager in the Office of the Chief Scientist, U.S. Food and Drug Administration (FDA). In this capacity, Dr. Clingman is responsible for providing strategic input in the development, implementation, management and reporting of key partnerships and scientific collaborations under the Agency's public health mission. Prior to her current appointment, Dr. Clingman served as a Technology Licensing Specialist and Intellectual Property Manager in the National Institutes of Health (NIH), Office of Technology Transfer. In this role, she managed the intellectual property portfolios, marketing and licensing activities for over 200 NIH and FDA owned inventions, ranging from novel vaccines and therapeutics to medical imaging software and devices. Dr. Clingman holds a B.S. degree in physics from Hampton University and a Ph.D. in biophysics from Johns Hopkins University. Her dissertation research involved understanding the biophysical mechanisms responsible for brain activation induced Functional Magnetic Resonance Imaging (MRI) signal changes and development of quantitative Functional MRI methodologies. Dr. Clingman is an author of several scientific papers in the area of quantitative MRI.
